Dettagli Articolo

Peso Articolo 1.500

RPS pumps use single-phase motors with shaded poles and are designed using innovative construction criteria ensuring very high hydraulic performances. Their components have been specifically designed for machine tools, ceramic and glass processes, and for all those cases in which liquids or coolants must be moved.

Special versions:Note

CENTRIFUGAL-PUMP with immersed vertical axis.

Single-phase motor with Class F.

Motor covered by plastic shell in PA66 30% glass fiber.

IP 54 degree of protection from liquids seepage.

Built-in thermal motor protection system.

NSK and SKF (long-life) self-lubricant bearings or equivalent, in semi-rigid and noise-damper housings.

AISI 303 INOX steel.

INOX steel or anti-oxidant materials.

shaded poles single-phase motor

Motors with voltages and frequencies according to the customer's specific requirements can be supplied..

Read instruction booklet for correct set up and use.
